

Crappie in Lake Granger How to Catch Them

Texas is famous for many different reasons and its great crappie fishing is one of them. One of the best places to go fishing in Texas for crappie is Lake Granger. This lake can be found in Williamson County just northeast of Austin. It was impounded in 1980 and covers a surface area of 4,009 acres. This lake is approximately fifty feet deep. When fishing Lake Granger in Texas you will find that the crappie fishing is best in the spring but the fall can be very productive as well. Most of the water here is muddy and much of the lake is shallow making it a great place to go crappie fishing. This is the type of habitat in which they thrive. You will find both black and white crappie in this Lake. These two types of crappie are very similar but there are a few distinguishing differences that make it easy to tell them apart. The white crappie has dark vertical bands on their sides and they are a silver color while the black crappie has dark blotches scattered over their silvery-green body. Crappie can grow up to 4.5 pounds but the average size for this species is about two pounds. When and Where to Fish Lake Granger Crappie will bite all year long if you are lucky enough to find where they are located. They will start moving towards the shallow water in February and they begin spawning when the water reaches about fifty-six degrees. During the spawning season the crappie can be caught in shallow water as low as one to two feet deep. This is the time when they feed the most actively and are usually easy to catch. You will find many flooded trees in the upper portion of the reservoir and this is a great place to look for the crappie. Other parts of Lake Granger has an abundance of main-lake humps, stumps, laydowns, pilings, docks, ridges and drop-offs, which is exactly the type of environment where the crappie can thrive. There is also a lot of brush that was placed in the Lake by anglers to provide more great places for the crappie to live and grow. However, to find many of these you will need to use electronic equipment. When the crappie are biting good many anglers have found that a 1/16 or a 1/8 ounce tube jig works very well. Minnows usually always produce great results no matter when you go crappie fishing on Lake Granger. It is good to try a variety of different methods when fishing this lake to see which ones work the best for you. When fishing for crappie in Lake Granger there are a few tips that can help you reel in more fish each time you go out. If you are fishing for black crappie, then you need to search in clear water around vegetation. If you prefer the white crappie, then they can be found mostly in dark and murky waters around brush and submerged trees.
